

ACCESSORIES WITH SPIRIT

GIPARA Fitness is a brand created by sport enthusiasts and practitioners. It is a sum of best ideas, thorough insight into the needs and several dozen of tests which confirmed its safety ergonomics and reaching training results.

GIPARA Fitness comprises accessories for individual exercise and training programmes which thousands of clients already got to love.

GIPARA Fitness means accessories which stand out against competition. Innovative solutions, unique designs and material quality are underlined by the colour range of accessories.

GIPARA Fitness provides full equipment for the whole fitness club, yoga studio, aerobics class and functional zone. And for each and every user it represents the power of possibilities and full satisfaction.

WALL BALL

BY GIPARA PROFESSIONAL

The ball has been specially designed to be thrown against a wall - ideal for crossfit training, as well as for general training. Exercises done with the Wall Ball improve muscle endurance, coordination and mobility. The balls have the same diameter, clear marking and double reinforced seams.

- 2 kg to 15 kg diameter 36 cm
- material: EPE + sand
- monochromatic version available

Synthetic leather

Easy cleaning

SLAM BALL BY GIPARA PROFESSIONAL

The ball is made of a practical material, making it ideal for general training in all conditions (outdoors and in the room). Thanks to the inserts, it is easier to catch the ball and the synthetic sand inside allows the ball to be immediately stopped on the surface. You can hit the ball with all the forces against the wall and other surfaces.

- 4 kg to 20 kg
 diameter 25 cm
- material: PVC + synthetic sand

GIPARA HIGH BAG

High Bag is one of the most universal training tools that perfectly complements functional training. The high-quality synthetic material from which it was made makes the High Bag is esthetic and its look does not change over a time. Ergonomic handles adapt to the hands of the exerciser and are resistant to moisture and dirt.

- material: top-quality synthetic material

BALANS BAG™ BY GIPARA PROFESSIONAL

Balans Bag™ is a bag with an extremely wide range of applications, when doing exercises with it involve hardly available so far training of all muscle belts. The intensity of training is not dependent on the choose of weight, but on the amount of water inside the bag. Constantly unstable fluid makes from even the simplest exercises the great challenges.

 material: polyester + PVC • 3 types of weight markings . heat insulating layer

· complete system with a stand
